Professional Summary

Dynamic Software Engineer at JHT, adept in C# and Unity, with a proven track record of enhancing training applications and simulators. Notable for elevating code quality through peer reviews and utilizing version control. Recognized for attention to detail and a strong focus on game design and user experience.

Work Experience

Software Engineer

JHT, A Precise Systems Company

Jan 2022 - Current

Orlando, FL

- Developed and maintained simulation and touch-based 3D training applications using Unity and C#.
- Participated in peer-to-peer code reviews to improve code quality, maintainability, and development standards.
- Managed source control and versioning workflows using GitHub and Perforce.
- Created and maintained technical documentation to support software functionality, compliance requirements, and internal processes.
- Assisted with debugging, testing, and enhancing training software in a compliance-focused development environment.

Lead Designer

Quick Match

Sep 2021 - Jan 2022

Remote

- Utilized Unity and Visual Studio to develop the levels, scripts, and the 3D animations.
- Designed and developed the scripts for the main menu, pause menu, and timer for player navigation.
- Implemented the music and other assets from 3rd party resources.
- Independently launched the game on Itch.io as the sole designer.

Lead Designer

Gateway Solutions

Jun 2021 - Oct 2022

Remote

- Lead a 7-person team of 4 designers and 3 game artists for 5 months until full launch of the game on Itch.io.
- Utilized Unity to develop 4 levels (2,4,8,12) with Visual Studio and C# to develop the portal's mechanics and features.
- Utilized Raycasting to allow the player to create and move the portals, change Unity physics and the UI to represent the portal's gravity effects on the player.
- Developed the player movement and the animation for the player model.
- Utilized Jira/Confluence to collaborate on ideas and check the progress and workflow for each team member.

Education

Bachelor of Science: Game Design

Full Sail University

Oct 2021

Winter Park, FL
